Global Q Solutions

A website that turns late-night worry into booked call-backs.

Website redesign and 24/7 AI assistant proposal for Global Q Solutions, Wynberg, Cape Town.

Proposal · November 2026

Confidential

01 · THE SHORT VERSION

Help people at the moment they reach out

Global Q Solutions helps people at one of the most stressful points in their lives. Most of them search for help late at night, on a phone, feeling embarrassed. Right now, the website doesn't build trust and doesn't capture those people when they're ready to act.

Modern, mobile-first website

Looks credible, explains debt review in plain language and leads every visitor to one action: book a free call-back.

Q, a 24/7 assistant

Answers questions, runs a private 2-minute debt check and books call-backs, so leads are waiting for the team at 08:30.

Savings calculator

Shows visitors what they could save each month, which keeps them on the page and gives them a reason to ask for help.

02 · WHAT WE FOUND ON THE CURRENT SITE

Ten issues costing trust and enquiries

	Issue	Why it matters
1	**Template placeholder content is still live.** "Please install Mailchimp plugin form wordpress plugin directory" and blog links like `/how-to-work-with-a-virtual-assistant-3/`	Visitors see the site as unfinished, which damages trust for a financial service
2	**Images load from someone else's server** (`demo.gutenify.com`), including the social-share image	If that demo site changes, Global Q's images break. Shared links show a generic stock image
3	**Two different addresses** ("124 Wynberg Centre" in the header, "123 Wynberg Main Road" in the footer)	Confuses visitors and hurts Google local search
4	**No NCR registration number shown**	The #1 trust signal for a debt counsellor
5	**"99.99% success rate" claim**	Hard to substantiate and a compliance risk
6	**"5 easy steps" promised but never shown**	The main headline makes a promise the page doesn't keep
7	**Social icons link nowhere or are generic**	Broken links look careless
8	**Typos and grammar** ("We helps you", unclosed quotation marks)	Credibility matters for a financial service
9	**No way to get help after hours.** Only a phone line (08:30–17:00) and a basic form	Debt stress peaks at night and on weekends. Those visitors leave
10	**No structured data, weak SEO basics**	Harder to find for "debt review Cape Town"

Built to earn trust and capture every enquiry

Design and trust

- Clean navy and red brand system drawn from the existing logo
- Trust bar: NCR registration, National Credit Act process, confidentiality, one monthly payment
- The "5 steps to debt-free" promise explained step by step
- Plain-language FAQ: Will I lose my car? What does it cost? Can I get credit?
- One consistent address, hours and phone number, plus Google structured data for local search

Conversion

- Every section leads to one goal: a free call-back
- Interactive savings calculator with a personalised result
- Call-back form with SA phone validation and POPIA consent
- Floating call or WhatsApp button, one tap away on mobile

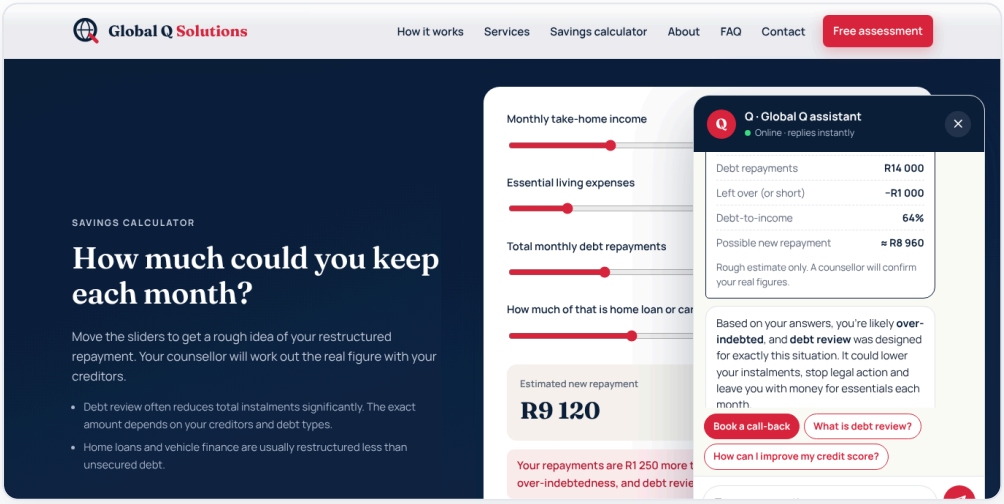

Performance and accessibility

- No page builder or heavy plugins, so pages load in a fraction of a second
- Keyboard accessible, screen-reader labels, reduced-motion support, 320px phones to wide desktops

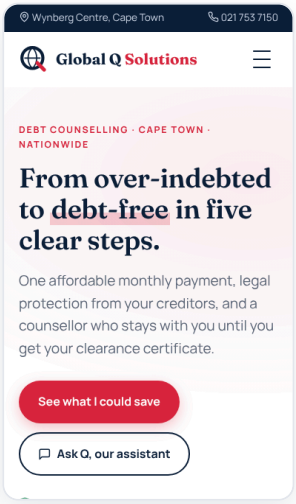

Q, the AI assistant

- Instant answers 24/7 on debt review, consolidation, removal, fees, credit scores and more
- **Guided 2-minute debt check** (income, expenses, debt, arrears) with a clear result and the right service recommended
- **Books call-backs in chat.** Name, number and best time go to the team with the debt-check results, so counsellors start every call informed
- **Offline mode:** works on any host with no running costs, using a curated knowledge base
- **AI mode:** powered by Claude (Anthropic). Understands free-form questions and replies in Afrikaans, isiXhosa or isiZulu, while following strict rules: no financial advice, no promises, never asks for ID or bank details
- **Leads dashboard** with an "over-indebted" flag and CSV export

Why it matters: a visitor who chats at 22:00 today becomes a qualified lead, with their figures attached, on the team's desk at 08:30 tomorrow.

Mobile view

04 · SEE IT IN ACTION

A five-minute walkthrough

1. Open the site on a **phone** first. Most clients will see it that way.
2. Scroll the hero and point out the trust bar and the 5 steps.
3. Move the **savings calculator** sliders and watch the result change.
4. Tap the red chat button, then **"Run my debt check"**. Answer R22 000 / R9 000 / R14 000 / "Yes, I'm behind" and show the result card.
5. Tap **"Book a call-back"** and complete it, then open the **leads dashboard** to see the lead arrive with its debt-check figures.
6. Ask Q something free-form, like "Will they take my car?" or "What does it cost?"

05 · BEFORE GOING LIVE

Details to confirm together

- [ ] NCR registration number (NCRDC…)
- [ ] Mobile / WhatsApp Business number
- [ ] Real social media links
- [ ] Compliance review of FAQ and assistant wording
- [ ] Correct street address (123 or 124?) and opening days
- [ ] Where leads go: email, CRM or WhatsApp
- [ ] Fee wording and real testimonials (with permission)
